WHAT OUR CUSTOMERS SAY

"We have found this to be the best of both worlds, it provides us with the ability to move pallets under power, but does not take up too much room. We tried powered pallet trucks from other suppliers, but found they were too bulky or they grounded out.
Our drivers love it, as they know when they have heavy pallets to deliver this machine carries the load."

TRANSPORT INDUSTRY

Pallex Member
Depot Manager

FOOD & DRINKS DISTRIBUTION

(with over 60+ Depots)

"We have found SHS very quick and easy to deal with. They have such a wide range of products that previously we had to use several suppliers for. Good quality sack trucks, pallet trucks and any other warehouse equipment.

Delivery is fast, on-time and I am always looked after!"

"We trialled various other pickers in the market and could not match anything as good as the JXI picker because of its unique steering system making its mooth and stable to drive, especially when picking at height. We found it is the only picker on the market with this pick height of its kind. This meant we increased our efficiencies in our warehouse as we could pick from level right up to 65m and with only one machine!

CONSTRUCTION INDUSTRY

Senior ManagerConstruction Site

"It really cuts down labour time on our building sites, it can pull a tonne pack of concrete blocks easily up a sloping drive. It has also reduced our health & safety claims.

I wish I had bought them sooner – I would highly recommend."

We're dedicated to providing our customers with the highest quality products and service.

If you feel that you haven't received the best service from us, we want to hear from you. We'll make sure that we do **everything possible** to change that!

SHS Handling Solutions Ltd is a leading supplier of materials handling equipment and workplace products, specialising in Li-ion powered handling equipment. A trusted supplier of EP Li-ion forklifts, pallet trucks, pickers, and stackers as well as other leading materials handling brands including Veltruk and Magliner.

SHS not only has a broad product offering, but it also provides nationwide servicing and repair to all its products whilst also being the largest supplier of EP parts and spares to the trade.

A family-owned business, SHS has been supporting businesses within the logistics, healthcare, food and drink, hospitality, and construction industry for almost 25years. Passionate, knowledgeable, and dedicated staff that is always willing to advise or assist, has made SHS not only a trusted name within the industry but experts in providing handling solutions.

We have developed a series of order picking solutions, tailored around the needs of the modern order picking warehouse.

MINI-PICKER 10 JX0

Model: LTOPJX0

The JXO from EP Equipment is the new generation task support vehicle. The main advantage compared to its competitors is the extremely stable mast and the intuitive user interface. It plays out its strengths in smaller volume order picking as well as the retail environment. JXO will reduce injuries in the work place and increase the efficiency in the warehouse.

With its low self weight and compact design it was designed for narrow aisles as well as the retail environment. The all new, JXO will increase safety and efficiency wherever goods have to be picked or stored in shelfes and racks. Work injuries during maintenance work in larger hights can be reduced compared to ladders due to the high stability, the possibility to reposition while man up and the large driver & storage compartment.

4.5 METRE PICK HEIGHT

| Total Capacity | 336Kg |
|----------------------|---------------------|
| Front Tray Capacity | 90Kg |
| Rear Tray Capacity | 110Kg |
| Platform Height | 3m |
| Overall Dimensions | 1365 x 1440 x 750mm |
| Charge Time (0-100%) | 8 Hours |
| Battery Type | Integrated Gel |

See the full SHS Liftek EP Power range online: **shshandlingsolutions.com**

ORDER-PICKER JX1

Model: HGJX1480

The JX1 can elevate an operator up to as much as 4880mm, turn around in as little as 1385mm, and can be driven while lifted and diagonally to move from task to task.

Travel is provided by a high efficiency AC drive motor that can be programmed through the onboard LCD dash, while power comes from a 224AH AGM maintenance free battery pack that supports opportunity charging from a standard 230V outlet. Optional a bigger size industrial battery with external charger is available

6.5 METRE PICK HEIGHT

| Total Capacity | 500Kg |
|----------------------|---------------------|
| Front Tray Capacity | 227Kg |
| Rear Tray Capacity | 137Kg |
| Platform Height | 4.8m |
| Overall Dimensions | 1590 x 1500 x 800mm |
| Charge Time (0-100%) | 8 Hours |
| Battery Type | Integrated Gel |

We have products to suit every budget and requirement, all of which are available to order online at a highly competitive price.

STANDARDTRUCK
